# Getting to know us

#### Our land...

Aruba is located in the heart of the southern Caribbean, 16 miles from the South American coastline. The island is 19.6 miles long and six miles across at its widest point, with a total area of 70 square miles.

Aruba's topography and vegetation are unusual for a Caribbean island. On the south and west coasts are miles of pristine white beaches that rank among the most beautiful in the world, rimmed by calm blue seas with visibility in some areas to a depth of 100 feet. The northeast coast along the windward shore is rugged and wild. The interior is desert-like, with a variety of cacti and dramatic rock formations. The island's most famous trees are the watapana (divi) trees, all permanently sculpted into graceful southeastbending shapes by the constant trade winds.

#### Our weather...

Except for a few scattered weather events annually and perhaps some limited showers on some days (welcomed by our tropical plants!), the sun does indeed always shine here. The average temperature is 82 degrees F. The hottest months are from May through October and the coolest months are from December through March. The greatest likelihood of precipitation is from October through January.

#### Our people...

There are about 108,000 inhabitants on Aruba, representing more than 96 different nationalities – all living peacefully together. Hospitality remains a strongly engrained tradition. Official languages are Dutch as well as the native tongue of Papiamento. Most Arubans are fluent in English and Spanish as well. Papiamento is a lilting, melodic language, evolved over the centuries

from an eclectic mix of Spanish, Dutch and Portuguese with a sprinkling of English and French.

Our government...

On January 1, 1986, Aruba became a separate entity within the Kingdom of the Netherlands. The Dutch government is still responsible for defense and foreign affairs. Aruba's system of government is based on democratic principles. The Governor is appointed by the Queen of the Dutch Kingdom acts as the sovereign's representative on the island. The legislature consists of a 21-member Parliament elected by popular vote. The Council of Ministers, presided over by the Prime Minister, forms the executive branch.

#### Our visitors...

Aruba attracts more than 800,000 international visitors annually and enjoys the highest return rate in the Caribbean. Perfect weather, hospitable people and world-renowned beaches are the most compelling factors for return visits. Also important are the island's mix of luxury high-rise and casual low-

rise resorts, unique natural beauty and culture, abundant land and sea activities, safety and security, and long-time friendships.

#### Our history...

Aruba's earliest inhabitants arrived in small vessels about 400 years ago from the South American mainland. These first Indians were hunters and gatherers who lived in small scattered groups. The crop-growing Caquetio Indians of the Arawak tribe arrived about 1000 AD and settled in three large villages.

The first European to land on Aruban shores was the Spanish explorer Alonso de Oieda, who is thought to have arrived about 1499. The Spanish had exported the Indians to Hispaniola and put them to work in the copper mines, although many later drifted back to work in the island's cattle- and horse-breeding industries. During the years that followed, ownership of the island changed hands several times. In 1636, near the culmination of the Eighty Years War between Spain and Holland, the Dutch took possession and remained in control for nearly two centuries. In 1805, during the

Napoleonic Wars, the English briefly took over Aruba, but it was returned to Dutch control in 1816.

In 1824, gold was discovered in Rooi Fluit on the north coast. Mining was done by hand until machinery was imported. In 1872, a large smelting works was built in Bushiribana, followed by another site twenty-five years later in Balashi. Gold mining

ended in 1916 when World War I broke out.

Phosphate mining began in 1879 and Aruba exported the raw material until 1914. Other commercial endeavors have included the breeding of cochineal, a cactus insect that produces a coloring agent; watapana tree pods which contain tannin; minor cultivations of silkworms, tobacco, cotton and peanuts; and most importantly, the cultivation of aloe and oil refining.

At the beginning of twentieth century, Aruba's economy was largely dependent upon aloe and one-third of the island was covered with plantations. With clay moisture-retentive soil yielding a product of superior quality, Aruba would ultimately become the largest exporter of aloe in the world.

In 1928, Royal Dutch Shell built the Eagle Oil Refinery, followed by Lago Oil and Transport Company Ltd in San Nicolas. In 1932, the Standard Oil Company of New Jersey (Esso, now known as Exxon) took over Lago. There were more than 8,000 employees at the peak of refinery production in 1949.

After many challenges, the refinery closed down in 1985, opening a window for tourism wich has now become Aruba's, principal industry.

The refinery was re-opened by Coastal Oil Company of Houston, Texas, in 1991, now Valero Energy Corporation.

A glimpse of Aruba from Indian inhabitation through colonial times and into the modern era can be seen at historical homes, cultural sites, and museums.

#### Our flag...

Our national flag was officially adopted on March 18, 1976, along with the official anthem "Aruba Dushi Tera." The four colors each have significance. The blue represents the sea that surrounds Aruba; yellow is the color of abundance, representing the island's past and its industries of gold, aloe and oil; red is for the love each Aruban has for the country and the ancient industry of Brazilwood; and white symbolizes the snowwhite beaches as well as the purity of the hearts of Aruba's people

The symbols on the flag consist of a red star and two yellow stripes. The red star represents the four points of the compass, with the island having drawn people from around the world. The star also represents the island itself, surrounded by the beautiful blue sea. The horizontal yellow stripes denote the free and separate position Aruba enjoys in the Kingdom of the Netherlands.

Arubans celebrate all that the flag and anthem have come to signify with the national holiday of Flag and Anthem Day each March 18, the same day that, in 1948, Holland accepted Aruba's right to autonomous status within the Kingdom of the Netherlands.

#### **CRUISE TRAVEL**

Thousands of cruise ship passengers disembark at the Port of Oranjestad each week throughout the year where they are greeted by tourism representatives and activity companies positioned to introduce them to Aruba's many and varied pleasures.

Cruise tourism to the island began in the early 1950s with the visit of the M.S. Libertador, a combination cargo/passenger ship belonging to the Royal Netherlands Steamship Company (K.N.S.M), now the Nedlloyd Line. Regular visits by passenger-only ships began in 1958 and have been steadily increasing in numbers ever since. Aruba is now on the itinerary of most cruise lines serving the Caribbean.

The height of the cruise tourism

season runs from October through April; however, numerous big ships and mega-liners visit the island year-round. Included are Holland America Line, Princess Cruises, Royal Caribbean Cruise Line, Celebrity Cruises and Carnival Cruises. Aruba is prepared to greet even more of the big ships with renovations and beautification plans scheduled by the Aruba Ports Authority.

For a complete cruise schedule, please contact Aruba Ports Authority by telephone (297) 582-6633 or visit their website <a href="www.arubaports.com">www.arubaports.com</a>. Aruba Ports Authority offices are located at L.G. Smith Boulevard 23, Oranjestad, Aruba.

#### **GETTING AROUND**

Getting around Aruba is quick and easy. Bus service to and from downtown Oranjestad and resort areas is reliable and inexpensive. Taxis are always available and have set rates.

Many visitors rent a car for at least one day to see the sights beyond resort areas. Driving is on the right side of the road, no right turns on red. Vehicles on the right generally have right of way. It is wise to familiarize yourself with road signs that differ from those in the U.S.; most car rental companies provide maps with a key to the road signs. After a rain, drive cautiously because roads are slick. Foreign and international driving licenses are accepted.

On the hotel side, there are paved roads and highways. There is public

parking lot behind the central bus station in downtown Oranjestad.

While many tour in the comfort of an air-conditioned motor coach, those more daring may prefer a jeep or all-terrain vehicle. A four-wheel-drive vehicle is a good idea when venturing off the beaten path in the interior and along the windward coast.

There is daily bus service all along the hotel strip. Fare is US \$ 1.50 (one way) or \$ 2.30 (round-trip). There is bus service every 15 minutes from 5:45 am until 6 pm; buses then run every 40 minutes until 11:30 pm. The central bus station in downtown Oranjestad is located across the road from the Cruise Terminal behind Royal Plaza. Check at your hotel for schedules and hours or visit <a href="https://www.arubus.com">www.arubus.com</a>.

Sharp geographical differences create a unique combination of land and sea activities. Calm glittering turquoise waters fringed by marshmallow-soft ivory beaches neighbor a national park encompassing a wild windward coast and unsettled rugged interior. Test your endurance on 20 miles of rugged hiking trails at Arikok National Park, climbing rocks at Ayo and Casibari, climbing 500 steps to the top of the Hooiberg, Aruba's second highest peak. For off-road adventure, rent a jeep, allterrain vehicle or mountain bike. Saddle-up for a scenic or challenging horseback ride.

Wet 'n wild fun awaits you right at your hotel beach where you can rent jet-skis, sunfish, paddleboats, wave-runners, banana boats and motorized tubes. Walkers will enjoy a brick beachfront path along the high-rise strip. Beach tennis and volleyball are perfect for fun and fitness. Most resorts have their own tennis courts.

Hop aboard a pleasure boat or luxury catamaran for a day of sailing. The calm waters of Aruba's leeward coast are great for sailing and the steady trade winds ensure favorable conditions for snorkeling adventures, sunset sails or dinner cruises. Visit www.aruba.com for a listing of water sports activities and cruises.

Dive operators offer expert instruction and PADI and NAUI courses including Open Water and Rescue Diver Certification, as well as basic bubble-maker and refresher courses. After learning how to deal

with fins, mask, tank and regulator, many go on to a shallow dive. Reef, wreck and night diving can all be arranged. Be sure to bring your open water dive certification.

The water is calm and perfect for swimming anywhere along the seven miles of Palm Beach, in front of the high rise resorts, and Eagle Beach. Snorkeling locales include Boca Catalina, De Palm Island, Mangel Halto and even some of the wreck sites where there is visibility of up to 100 feet. Watch out for very rough surf all along the northeast coast. Signs are posted at dangerous areas. Kayak in the calm waters of the mangrove-covered south coast near Savaneta and cross the Spanish Lagoon.

De Palm Island is a private tropical paradise. Choose a relaxing day of sunbathing and leisure or exciting thrills at the new, spectacular water park. Waters teeming with

abundant aquatic life, including brilliant blue parrotfish found only here, delight swimmers and snorkelers. The water slide park on De Palm Island boasts a shallow pool, six riveting waterslides and over 70 fun-filled water activities including net climbing, craw tunnels, spinning trays and bubble jets. The attractive all-inclusive package includes food and beverage, snorkeling equipment and instruction, and various island activities.

Behold a brilliant world of sea life with Sea Trek as you walk twenty feet below the surface in zero gravity along a 375-foot-long path. Air is safely delivered to the underwater helmet. Feed the fish, view the wonders of a man-made reef, and take your seat at the "Sea Trek Café".

Snorkelers will love SNUBA, an underwater breathing system that combines snorkeling and scuba. Descend to a depth of 20 feet with your swim fins, diving mask and breathing apparatus. Air is delivered through a long hose from tanks on pontoon rafts on the surface.

For a tour of Aruba's spectacular brilliantly-colored coral reefs, hop aboard Atlantic Submarine descending to a depth of 130 feet. In theSeaworld Explorer semi-submarine, you sit in airconditioned comfort just five feet below the surface to behold an amazing underwater panorama.

For deep-sea fishing, half and full-day excursions go five to seven miles offshore. Game fish catch includes sailfish, blue and white marlin, dorado, wahoo, shark, barracuda, kingfish, bonito, amberjack and black and yellow fin tuna. Enjoy bottom fishing on a sports yacht where equipment and bait are provided for reeling-in snapper, grouper, triggerfish and squirrelfish.

Known as the wreck-diving capital of the Caribbean, Aruba's entire south coast is a coral reef with over twenty dive sites and eleven diver-friendly wrecks such as a plane, tugboats, cargo ships and historic vessels such as the Antilla and Pedernales. Aruba's easily accessible reefs and shallow formations of coral will fascinate

snorkelers while reef and wreck diving reveals a brilliant underwater panorama of sea life. Shore dives are possible off De Palm Island, Pos Chiquito and Baby Beach.

Aruba ranks in the top five worldwide as a windsurfing destination due to flat-water locations, challenging wave conditions, extensive shallows and constant trade winds averaging fifteen knots year-round. Strong winds also attract kite surfers who catapult themselves high above the water in mid-air acrobatics.

Golfing in Aruba combines the challenge of constant trade winds and tropical sun with the wonder of desert beauty and sweeping Caribbean views. Tierra del Sol is a unique 18-hole championship (6,785 yards, par 71) desert course with an ocean view, designed by Robert Trent Jones II. The Links at Divi Aruba is a nine-hole course designed by leading architects; golfers play on paspalum grass, over water and beautifully-landscaped lagoons.

# Beaches

Fringing turquoise Caribbean waters, Aruba's beaches include wide shaded expanses, quiet retreats, and busy sunbathing and water sports meccas. Much of the seven-mile strip along the west coast is lined with resorts and packed with activity. Beachgoers relax on their comfortable lounges while swimming, snorkeling, kite surfing, waterskiing, tubing, parasailing, bananaboating, and all kinds of wet 'n wild adventures are just steps away.

In contrast, the beaches along the windward coast are in more secluded and undeveloped areas. There are coves carved out of limestone, inlets formed by pounding waves, unique natural phenomena and craggy desert terrain. Because of strong undertow and crashing waves, swimming here is not recommended. Both coasts afford spectacular Caribbean views. All beaches are open to the public.

#### Palm Beach

The renowned two-mile-long strip known as Palm Beach is home to glamorous high-rise resorts and dotted by water sports concessions, piers, beach bars, restaurants and shops. Calm waters make this a comfortable haven for swimmers and snorkelers. Enjoy a walk along the coast at dawn or sunset, viewing the magnificent sunset and enjoy candle-lit, barefoot dining on the beach.

#### **Eagle Beach**

Acclaimed as one of the world's most beautiful beaches, Eagle Beach is a long, uninterrupted stretch of glittering ivory sand with ample parking and palapas for shade. Some nearby hotels. Some nearby hotels provide cabanas and lounges for their guests. During Easter week, tents dot the coastline as local families enjoy the tradition of camping out.

#### **Baby Beach**

Baby Beach is located in Seroe Colorado at the southeastern end of the island. It is a sandy half-moon sandy expanse in a calm lagoon, with a refreshment stand and huts. The waters are shallow; swimmers can wade out for a long distance and still touch the sea bottom. Where the bay opens out to the sea, snorkelers should watch out for strong currents here.

#### **Rodgers Beach**

Rodgers Beach is a narrow powdery white strip close-by where fishermen anchor their boats, protected by the calm waters of the bay.

#### **Malmok Beach**

Malmok Beach is a narrow sandy stretch that is home to sprawling homes and a variety of modest windsurfing residences; its shallow clear waters make it a popular snorkeling spot. Here catamarans and sailboats stop for a daytime snorkeling stop just off the shoreline. Reefs and sunken wrecks nearby afford excellent diving. Boca Catalina is a small, secluded bay accessible by steps, perfect for a private swim.

#### **Druif Beach**

Druif Beach, a long, narrow ovalshaped stretch of ivory sand, is home to the casual low-rise resorts. Here, rooms are just steps away from the relatively calm Caribbean waters. Though not too far from bustling downtown Oranjestad, Druif Beach is a quiet and relaxing spot for sunning and socializing.

#### **Manchebo Beach**

Just past the low-rise resorts is Manchebo Beach, a very private, undisturbed area named after an Arawak chief. This very wide stretch of flat beach is dotted with swaying palms and the occasional beach lounge. Jutting out at the island's most western point, it has some rough surf resulting from converging currents.

#### Hadicurari Beach

Hadicurari Beach (Fisherman's Huts), a rocky strip out past the Marriott Aruba Resort, is a popular spot for windsurfing and kitesurfing enthusiasts and the venue for many sporting events and tournaments throughout the year.

#### **Mangel Halto**

Mangel Halto is located in Pos Chiquito on the southeast coast just south of the Spanish Lagoon. It is a perfect picnicking, sunning, shore diving and snorkeling spot with calm, shallow waters rich in sea life supported by an intriguing network of mangroves.

# Arikok National Park

When exploring off the beaten path, be sure to bring plenty of drinking water, snacks, hats, sunglasses and sunscreen. Sturdy shoes are recommended to protect against sharp corals, rocks, and uneven terrain. The sun's rays are especially strong from 10 am to 3 pm...

Arikok, a nature preserve covering almost one-fifth of Aruba's surface area, contains historical sites as well as Aruba's three geological formations that support unique, indigenous plants and wildlife and have influenced human settlement. It is on the great granite rocks of Arikok that the island's earliest inhabitants left their mark. Painted by Caquetio Indians, the drawings are at least 1,000 years old. Twentyone miles of well-marked trails await hikers.

The park encompasses Mount Jamanota, Aruba's highest point reaching 620 feet, underground Indian caves and everything in between. Sand dunes and limestone cliffs are found along the coast.

Among the desert vegetation in the park are divi-divi trees, rare and exotic cacti, aloe plants, and colorful tropical flowers.

Wildlife includes the cascabel (local rattlesnake) and santanero (cat-eyed snake). The shoco (burrowing owl), prikichi (Aruban parakeet), kododo blauw (whiptail lizard) are among its residents. Iguanas and many species of migratory birds live in the park as well, and goats and donkeys graze on the hills.

Cunucu Arikok is a restored farm that recreates life in the early days. The tiny, two-room house of mud and grass adobe, cas di torto, is surrounded by stone walls and cactus fences. Miralamar, a complex of gold mines and trenches, was

active during the first decade of the 20th century. Masiduri served as an experimental garden in the 1950s. Prins Plantation, a complex of abandoned adobe structures. cultivated hundreds of coconut trees as recently as the 1960s. Hofi Fontein is the only place along the north coast with a freshwater spring.

Because of strong undertow and crashing waves, swimming on the windward side is not recommended, but the beaches on Aruba's wild coast are magnificent. Amazing natural bridges created about one million years ago are found along the north coast.

Boca Grandi is a semi-circular reefprotected cove with on-shore winds that make it a popular windsurfing

spot. Boca Prins is a small secluded cove amidst rugged limestone cliffs fringed by snow white sand dunes. Fuente is a rocky cove pounded by surf. Dos Playa features two coves carved out of the limestone bluff; wide sandy beach attracts sunbathers and is perfect for picnics. Protected from the rough sea by surrounding rocks, the Natural Pool was once used to hold sea turtles.

The adventurous will enjoy exploring the caves along the northeast coast. In Fontein, the largest and most accessible, drawings left by Amerindians and graffiti etched by early European settlers ornament the walls and ceilings. Quadirikiri is a short distance away, on a similar ancient sea cliff. Openings in the ceiling provide natural light for the five hundred foot-long cave; bats residing here are quite harmless. The Huliba Cave and Tunnel of Love (Sabana Sulu), named for its heart-shaped entrance, are part of the

same underground cave system.

Rock formations are of mysterious origin. At Ayo, you can meander through stacks of giant boulders of curious shapes and sizes. In the center of the island is the Casibari Rock Formation. Climbing through piles of rocks, a narrow path leads up to the top, affording a beautiful panoramic view. A large desert rock garden is at ground level.

# Historical Sites

#### **Alto Vista Chapel**

Known as the Pilgrim's Chapel, the small, bright yellow Chapel of Alto Vista is the picture of tranquility in its dramatic setting on a high coastal plain. The chapel was the island's first Roman Catholic Church, built in 1750 and reconstructed in 1953. It is reached by a winding road lined with white crosses marking the Stations of the Cross. It is a special place for peace and contemplation in a magnificent natural setting.

#### Santa Ana Church

When it was constructed in 1776, Santa Ana Roman Catholic Church in Noord was the island's second most important religious meeting place (the first being Alto Vista Chapel). It was rebuilt twice during the 19th century and a final renovation was made in 1916. Its solid oak, hand-carved altar is a recognized work of art in classic neo-gothic design.

#### Frenchman's Pass

French pirates attempted to invade Aruba during the first quarter of the 17th century. When an Indian tribal head and his group tried to stop them in this narrow passage, they were killed. Legend has it that their ghosts preside over this tranquil scenic spot.

#### **California Lighthouse**

More than ninety feet high, the imposing California Lighthouse overlooks both a barren lunar landscape and a glittering Palm Beach panorama. It was built in 1914 of local stones and is named after an English steamship that was shipwrecked off the coast.

#### Balashi and Bushiribana Gold Mills

In 1824, gold was discovered on the north coast by a young boy. Ultimately, the search turned to gold bearing quartz and mines were created with dynamite. The Balashi gold mill was built at the tip of the Spanish Lagoon near Frenchman's Pass. In 1872, Aruba Island Gold Mining Company Ltd (London) built a large smelting works at Bushiribana on the north coast. Though only in use for a decade, Bushiribana's construction was so solid that impressive ruins still remain. Creature Features
